

Become a sponsor at the 8th annual **21st Century Energy Transition Symposium!**

Date: April 1-2, 2019

Location: Grand Hyatt, 1750 Welton Street, Denver, CO

This popular event will have over 55 speakers and 16 sessions including breakout sessions. The past symposia have a reputation for offering balanced, timely, educational and interesting energy-related topics. Between 800 and 1,100 people have attended the symposia each year. For more information go to www.CERCsymposium.org

Check out the many benefits you will enjoy as a sponsor including the invitation-only dinner on April 1 held at the Grand Hyatt. This dinner has proven to be a valuable way for networking with top leaders in industry, academia, government, policy and regulation, among a few. [Click here for information & sponsorship levels.](#)

Co-hosted by the four Colorado Energy Research Collaboratory partners including University of Colorado Boulder, Colorado School of Mines, Colorado State University and National Renewable Energy Laboratory this year's symposium will be taken to the next level. www.ColoradoCollaboratory.org

The ways in which we power the world are complex, and will only grow more so. Tackling that complexity will require advances in all energy sources, as well as in the ability to combine or switch seamlessly among them. Since 2008 the four Collaboratory entities have worked together on innovations and solutions involving research surrounding the full spectrum of energy sources, while partnering with their supply chains, industry & research partners.

Who will attend: Energy industry (all sources of energy), environmental, renewables, researchers, scientists, venture capitalists and philanthropic organizations, energy-related organizations, law firms, entrepreneurs, small/medium/large companies in energy and environmental sectors, federal agencies, government, municipalities, elected officials, regulators, policy makers, utilities, academia, students, faculty & community.

Symposium Co-Hosts

Colorado State University
