## Our Three Educational Pillars

### Youth

*Big challenges require forward reaching solutions* - Through educational outreach and tours for Colorado schools, we teach youth about solar energy, agriculture, and the combination of the two into agrivoltaic systems. Kids are inherently curious and creative. We help them imagine a sustainable future.

*Seeing is believing* - We provide public and private tours to individuals, community groups, and businesses to showcase agrivoltaics as a new kind of solution to our growing energy, food, and land use challenges.

### Communities

### Policymakers

*Colorado is leading the charge* - The future of renewable energy deployment rests with our policymakers who need to understand how best society can install solar arrays while keeping the soils beneath them productive.

# A Community Solar Garden

# A Night on the Farm!

Saturday, September 25th - 5:00pm-8:00pm

The [Colorado Agrivoltaic Learning Center](#) and [Sprout City Farms](#) will be co-hosting a fundraising event at Jack's Solar Garden!

Food will be prepared by local chefs from [Bin46](#), [Summit Tacos](#), and the [Java Stop](#) featuring farm-fresh produce, with cocktails courtesy of [Laws Whiskey House](#), beer courtesy of [Upslope Brewing Co.](#) (Kernza Kolsch with Solar Grown Honey), and wine courtesy of [Clif Family](#). The robust hors d'oeuvres menu will also include solar-grown foods from other agrivoltaics projects: Bare Honey and MNL lamb.

Beyond food and drinks, there will be [dance performances](#), [live music](#), and an educational walk with partners of Jack's Solar Garden.
